PROFESSIONAL SUMMARY

AWS Certified Cloud Practitioner and AI Practitioner, and an Information Technology graduate (June 2026) skilled at bridging business requirements and technical solutions — authoring Business Requirements Documents, designing systems, and building working prototypes from concept to deployment. Pursuing the AWS Solutions Architect Associate certification and targeting Business Systems Analyst or IT Operations roles that combine technical depth with stakeholder translation.

EDUCATION

University of Batangas – Batangas City	June 2026
Degree: Bachelor of Science in Information Technology (BSIT)	
GWA: 1.54 (Scale: 1.00 Highest)	
Honors: Cum Laude Dean's Lister	

PROJECTS

AUXILIARE: Philippine Founder-Investor Ecosystem Platform June 2024 – June 2026

Founder & Product Architect — Recognized as 2nd Best Research Paper and 2nd Best Poster at UBIAN Legacy 2026

- Defined product requirements and overall system design for a Philippine founder-investor matching platform, translating business goals into specs across frontend, backend, and cloud.
- Led design decisions — user journeys, data modeling, and cloud service integration — and coordinated cross-functional development from concept to a deployed platform.

PROFESSIONAL EXPERIENCE

Teletronic Systems Inc. (TSI / bedoo), Metro Manila January 2026 – April 2026

Product Developer / IT Intern (486 hours)

- Sole developer of a multi-tenant Condo Management System for a TSI client: ran stakeholder interviews, authored the Business Requirements Document and scope charter, and pitched it to the CEO for approval.
- Built it on Google AppSheet and Apps Script with a React/Vercel web portal — role-based access for six roles, real-time notifications, payment and balance tracking, and ownership transfer with data retention.
- Built a proof-of-concept DragonPay–AppSheet–Xero integration via REST API and webhooks — mapped the payment flow in a DFD and developed the Apps Script bridge for automated pending-to-paid updates.

Valley O'Ville Family Resort, Calatagan, Batangas (Part-time, Flexible) August 2023 – Present

Operations Associate

- Built and maintain the resort's website (online booking calendar, quote system) and digital presence — social media, Google Business Profile, and web analytics (GA4, Meta Pixel, Search Console) — to improve coordination and drive bookings.
- Maintain financial records to support day-to-day operations.

TECHNICAL SKILLS

- | | |
|---|--|
| ▪ Languages: PHP, JavaScript, TypeScript, SQL | ▪ Databases: MySQL, PostgreSQL |
| ▪ Frameworks & Libraries: Laravel, React.js, Tailwind CSS | ▪ DevOps & Tools: Git/GitHub |
| ▪ Cloud: AWS (Cloud Practitioner-certified; EC2, S3, RDS, SES), Laravel Cloud, Vercel, Docker | ▪ Methodologies: Agile/Scrum, SDLC, UML Modeling, ER Diagrams |
| ▪ Platforms & Low-Code: Google AppSheet, Google Apps Script, Google Workspace, Microsoft 365 | ▪ APIs & Integration: REST APIs, Webhooks, DragonPay |

CERTIFICATIONS

- | | |
|--|---|
| ▪ AWS Certified Solutions Architect - Associate (SAA-C03) | ▪ Cisco Networking Academy: Cyber Threat Management, Linux Unhatched |
| ▪ AWS Certified AI Practitioner (AIF-C01) | ▪ Google: Foundations of Project Management |
| ▪ AWS Certified Cloud Practitioner (CLF-C02) | ▪ GitHub: Foundations |
| ▪ CompTIA: IT Fundamentals+ (ITF+) | ▪ Anthropic: AI Fluency & Claude 101 |
| ▪ Fortinet: NSE 1 & NSE 2 (Network Security Fundamentals) | |

COMPETENCIES & INTERESTS

- **Business Analysis & Systems:** Requirements Gathering, Stakeholder Interviews, BRD, Process Mapping (DFD), Systems Analysis, Technical Documentation, Executive Pitching, Wireframing, User Journey Mapping
- **Delivery & Collaboration:** Agile/Scrum, SDLC, Cross-Functional Communication, Stakeholder Engagement
- **AI-Assisted Engineering:** AI-augmented development and research, LLM-integrated workflows, prompt engineering
- **Analytics & Marketing:** Google Analytics 4, Meta Pixel, Google Search Console
- **Technology Interests:** Cloud Infrastructure (AWS), Artificial Intelligence & ML, Data Analytics, Enterprise Systems
